

43 AMOG

MISSION BRIEF

IG- Inspector General

Mission:

Perform inquiry into and reporting upon discipline, efficiency, economy, and readiness

Vision:

Empower commanders to drive change and to sustain a credible Air Force Inspector General system by executing assessments and managing a responsive complaints resolution program

Priorities:

Posture for Exercise Success, Lay Foundation for Inspections, Right-size all IG Functions

Who we are:

We are a team of seven, both military and civilians, encompassing diverse career fields and experiences. We are one of the few Group-level IG offices in the Air Force.

What we do:

We manage the commander's exercise and inspection programs, we execute complaints resolution strategies, and we monitor adverse information on assigned officers.

Who we support:

We're a Group Staff Agency, and directly support the Group Commander, Squadron Commanders, and assigned unit personnel. Issues identified and resolved through IG lines of effort will contribute to overall AMOG mission effectiveness.

How we tie into the greater mission:

Using inspections and exercises, we provide leadership with impartial and accurate unit and program readiness assessments, ensuring all units are fully ready to execute their primary missions. By identifying risk, we allow commanders to address gaps and seams, mitigating risk to our without-fail mission.

Our accomplishments:

We were Air Mobility Command's nomination for the Inspector General Office Lieutenant General John P. Flynn Award in 2021.

Our challenges:

Maintaining oversight of hundreds of programs requires a cadre of highly-trained and motivated subject matter experts. Identifying and training the best Inspection Team is challenging, but is essential to IG and Group program success.

WHERE WE ARE GOING...

We are building and improving our processes to best support the 43 AMOG as its mission evolves and postures for success in the next conflict. We will adapt our exercises to align with newest capabilities and ensure a level of realism which will heighten overall impact and assessment.
