

43 AMOG

MISSION BRIEF

XP- Plans & Programs

Mission:

Provide operational readiness planning, executive support, and management on matters pertaining to readiness, contingency response, plans and programs, and procedural compliance

Vision:

Achieving program goals and objectives across multiple functions and disciplines while providing a focused, seamless, and supportive environment in order to conduct effective air, space, and cyberspace operations.

Priorities:

Upgrade Facilities, Implement C2IMERA IAW the AMC CONEMP, Explore and Maximize Envision Capabilities

Who we are: We are a two-person shop with a wide range of expertise. Because of the unique structure of the 43 AMOG XP post-BRAC, and the closing of the 440th Reserve Wing, the 43 AMOG/XP conducts duties and functions not seen in most traditional XP shops such as antiterrorism, OPSEC and expertise in multiple security disciplines.

What we do:

We manage Group plans, Operating Instructions, AFI waivers, the Lessons-Learned Program, the Group Readiness Office, signature management, CAT direction, foreign disclosures, and antiterrorism.

Who we support:

We directly support the AMOG/CC, interface with XVIII Airborne Corps, and we interact with Fort Bragg Directorate of Plans, Training, Mobilization and Security and Director of Emergency Services.

How we tie into the greater mission:

We facilitate effective, cohesive decision making and superior mission execution supporting the 43 AMOG, joint partners, and civil agencies in support of contingencies operations, special missions, natural disasters, and emergency response. We serve as the liaison and SME in matters of antiterrorism and counter terrorism to the Fort Bragg Installation Antiterrorism Office.

Our accomplishments:

When the pandemic hit, we used collaborative tools to maintain CAT functions, and conduct meetings and daily tasks in a fully virtual environment. This became critical when XP was given the task of coordinating all COVID posturing, including reporting and implementing guidance.

Our challenges:

We are expanding the capability of the CAT facility because the current system is limiting.

WHERE WE ARE GOING...

We will take advantage of the full Office 365 Suite of Applications to provide better customer service to our customers, we will continue to improve our use of Teams and SharePoint as our focal point for day-to-day coordination and action, and we will improve our capability to provide an effective and efficient command and control platform for our daily and emergency operations.
